Executive Summary

Computer Science and Engineering student with skills in Java, JavaScript, Python, and React.js, with an interest in full-stack and application development.

Knowledge of responsive UI development, REST API integration, database management, debugging, and testing.

Developed academic projects involving student records, and an ADAS concept for Indian roads.

Brings problem-solving ability, adaptability, and a strong interest in building user-friendly software solutions.

Technical Skills

- Programming Languages: Java, JavaScript, Python
- Frontend Technologies: React.js, HTML, CSS
- Web Development: Full Stack Web Development, Responsive UI Development
- Application Development: Web Applications, REST API Integration
- Version Control & CI/CD: GitHub Actions
- Other: Database Management, Debugging, Testing, UI/UX Design, Research & Analysis

Soft Skills

- Problem Solving
- Adaptability and Quick Learning
- Analytical Thinking
- Interest in User-Focused Design
- Specific project outcomes and quantified performance results were not provided in the source resume.

Selected Projects

Student Management System

Role: Project Contributor

Responsibilities:

- Developed a web-based system for managing student records.
- Included functionality for attendance management.
- Included functionality for recording and managing marks.
- Used Java, React.js, JavaScript, and Python in the project.
- Applied database-management concepts to organize student information.

Impact:

- Created a centralized web-based approach to managing student records, attendance, and marks; quantified results were not provided.

ADAS in Indian Roads

Role: Project Contributor

Responsibilities:

- Designed an Advanced Driver Assistance Systems (ADAS) concept for Indian road conditions.
- Explored obstacle-detection features for the concept.
- Included collision-alert functionality in the proposed concept.
- Applied UI/UX design considerations to the concept.
- Used research and analysis to inform the project design.

Impact:

- Outlined an ADAS concept addressing obstacle detection and collision alerts for Indian roads; implementation results were not provided.

Education

Bachelor of Engineering (B.E.), Computer Science and Engineering

KIT – Kalaignar Karunanidhi Institute of Technology | Expected Graduation: 2029

CGPA: 6.9/10

Awards & Accomplishments

- Java Programming Certification — completed coursework covering object-oriented programming, problem-solving, and application development.
